EXPERIENCE

June 2022 – June 2023
Sr. Full Stack Software Engineer • EverQuote, Inc. • *Remote*

> *TypeScript – React – Python – AWS – Kubernetes – GraphQL – Twillio – HTML – CSS*

- Developed and maintained internal CRM software written in Python and React.
- Consolidated multiple front end component libraries into one, and created new components in line with new company design guidelines.
- Created, shared, and collaborated on technical design documents with team and stakeholders.
- Refactored complicated call, lead, and activity routing logic to improve overall system stability and performance.
- Created documentation, provided knowledge sharing sessions, and mentored new team members.
- *Laid off due to reduction in force – June 2023*

May 2018 – May 2022
Sr. Software Engineer • Lincoln Financial Group • *Dover, NH*

> *Java – TypeScript – React – Node – Spring – GraphQL – AWS – Auth0 – Twillio*

- Frontend team lead working to consolidate multiple systems into one seamless user experience.
- Mentored junior developers with a focus on code quality and application stability.
- Created a responsive web application using React, Node, and GraphQL. Deployed to AWS using Docker.
- Leveraged technologies like Auth0, New Relic, Log Rocket, Docker, and AWS to create and maintain robust and reliable consumer-facing web applications.
- Worked closely with product owner and stakeholders to mockup, test, and implement UI/UX changes.
- Utilized paired programming, test driven development, and behavior driven development to quickly build out and pilot new claims tool.
- Collaborated closely with teammates to regularly deliver enhancements using Kanban and Scrum to work efficiently and respond to changing requests.
- Reviewed and provided feedback on code written by other developers during code reviews.
- Focused on writing high quality, well tested code using unit tests and code.

June 2014 – May 2018
Software Engineer • Liberty Mutual Insurance Group • *Dover, NH*

- Designed, developed, and tested Spring based payment application built on AWS.
- Provided production support for critical financial tools.
- Maintained and updated existing Struts based sales tools.
